**RESPONSE**

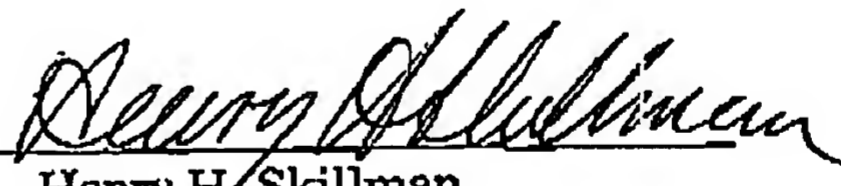

In response to the Official Communication dated October 19, 2005, Applicant hereby elects with traverse claims directed to the invention of Group I, namely claims 1-11 and 21-23.

It is requested that the Examiner reconsider his requirement for restriction inasmuch as the claims of Group II are drawn to a subcombination of the structure defined in claim 23. It is noted that the combination defined in claim 23 requires that the bracket comprise a plurality of flexible spring sheets in the socket, the spring sheets being biased inwardly toward the longitudinal axis of the socket and imparting inward pressure on the railing. Thus, the combination defined in claim 23 requires a bracket as defined in claim 15 and claims 15-20 and 24 may properly be examined along with the elected claims.

Favorable reconsideration is respectfully requested.

Respectfully submitted,

DANN, DORFMAN, HERRELL AND SKILLMAN
